HDCVI-AI

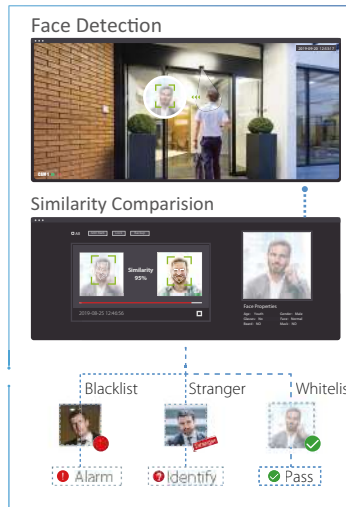

AI series products adopt the most advanced AI technologies, including deep learning algorithm that primarily targets people and vehicles, which provides higher flexibility and accuracy for end-users. Beyond seeing the world, the power of AI allows devices to perceive the environment and understand the world in a better way.

Perimeter Protection

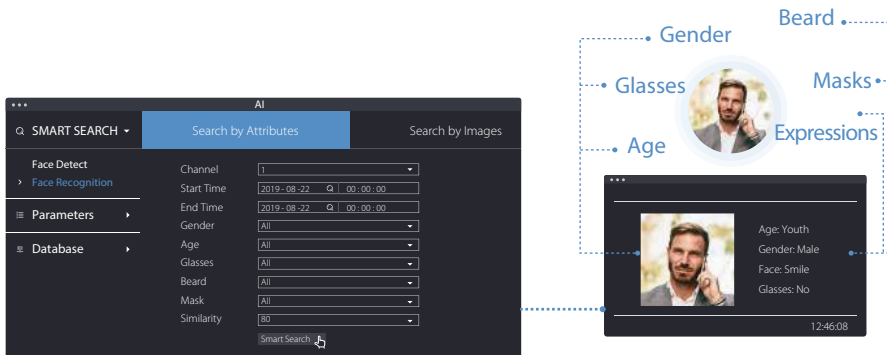

- Perimeter protection based on configurable motion detect, tripwire and intrusion rules. Send alarm to users when unwanted movements occur.
- Reduces false alarms with intelligent analysis, allowing users to focus on real threats like human and vehicle.
- Filters out less important objects including animals, insects, leaves, light, rain, etc., avoiding unnecessary actions.

Face Recognition

- Sets blacklists to seek out suspects among huge crowd and send alarms simultaneously.
- Sets whitelist to allow authorized persons to pass, replacing manual check at entrance control.
- Distinguishes strangers and sounds alarm when unexpected persons entering the restricted area.
- Supports up to 24 pic/s face recognition and 20 database with up to 100,000 face images, fully guarantees recognition accuracy and process efficiency.

Metadata Search

- Target object modeling with human face attributes including gender, age, glasses, masks, beard and expressions.
- Target search with attributes, enhancing search accuracy and efficiency.
- Provides human-related metadata to platforms, allowing potential business applications realized by third-party.

4K Ultra High Definition

4K features 4 times the resolution of 1080P. Therefore, 4K products present images with impressive clarity and abundant details. As the first technology to release 4K-over-coax, HDCVI again leads the industry with a new and complete 4K product series which better fits the needs of various application and projects with different scales and budgets, enabling 4K to prevail in the market.

Provides crystal-clear details even during digital zoom with 4x pixels more than 2MP video surveillance.

Starlight+

Performance under low illumination is a common challenge faced by the surveillance industry. The HDCVI 4K series adopts an up to 4/3" large sensor and advanced image processing technology to ensure high performance even under ultra-low light conditions.

- Large aperture combined with big pixel size (4.63μm) ensures Starlight+ performance.
- Excellent full color image quality even under low illumination.

Non-Starlight

Broadcast-quality Audio

Audio info supplies supplementary evidence to video surveillance, and can be used to settle disputes. In applications where conflicts occur, such as checkout counters, loud and clear audio can be useful to uncover reasons for the event. HDCVI offers multiple models supporting audio-in interface or built-in mic. Taking advantage of innovative lossless audio-over-coax transmission technology and advanced noise reduction algorithms, HDCVI is now able to provide users an enjoyable experience with newly released broadcast-quality audio.

*All Fighter series cameras are equipped with audio-in interface, which can connect to pickup. Built-in mic is also supported on select models.
